+ And Many More

When you deploy Clinics on Cloud Health ATM, you don't just install a device - you enable a fully integrated, AI-driven care delivery system that screens patients in minutes, understands their context, generates intelligent insights, and connects them instantly to doctors. **Built for India. Ready for the world.**

01 HOW IT WORKS, END-TO-END FLOW

01

SCREEN

Smart Screening

- 65+ vitals captured via integrated medical devices
- AI-assisted medical & family history collection
- Voice-enabled, multilingual interaction
- Designed for first-time & rural users

02

ANALYSE

AI Intelligence Layer

- Instant analysis of ECG, heart sounds & vitals
- Context-aware insights with history & trends
- Risk indicators + health score generated live
- Smart Reports delivered via WhatsApp

03

CONNECT

Doctor Connect, Redefined

- Full patient context surfaced in 15 seconds
- AI-assisted consultation workflows
- Voice-editable AI-generated prescriptions
- E-prescription auto-sent to the patient

02 THE FLAGSHIP PRODUCT

01. SMART KIOSK

Health ATM

A COMPLETE HEALTH CHECKUP · ANYWHERE · IN JUST 10 MINUTES

THE EXPERIENCE

No Waiting

No Paperwork

No Dependency

THE OUTCOME

- Early Detection
- 70-80% Lower Cost
- Universal Access
- Real-Time Analytics
- Data-Driven Decisions

WHY IT WINS

- Works without Internet
- No Skilled Staff Needed
- Clinical-Grade Accuracy
- AI Powered Intelligence
- Instant Digital Delivery

From Screening to Consultation - Everything in One Smart Kiosk

02. HEALTHCARE ON WHEELS

Mobile Medical Unit

A fully equipped healthcare-on-wheels solution delivering diagnostics, consultations, and preventive care wherever it's needed.

Integrated Health Kiosk

AI-powered health screening, Vital assessments & teleconsultation.

Self-Sustained Medical Unit

Air-conditioned cabin with uninterrupted power backup for reliable care.

Customizable Diagnostics

Supports X-ray, breast cancer screening, biochemistry analyzers and more.

Build for Last-Mile Healthcare

Extends quality healthcare to villages, camps and outreach programs.

Every MMU is more than a vehicle. It is your **moving healthcare infrastructure**

- It **carries your brand** into the community
- Extends **quality healthcare** to the last mile
- Enables **large scale outreach**, screening and public health programs
- Powers **measurable CSR, ESG** and community health initiatives

03. PORTABLE UNIT

Box Clinic

HEALTH BOX - FIELD CARE UNIT

A portable mobile healthcare unit door-to-door care for the last mile, carried like a suitcase, deployed anywhere.

Portable Suitcase Design

All devices in one compact, easy to carry aluminum case.

Health Camps and ASHA Workers

Purpose-built for mass screenings & door-to-door community delivery.

Real-Time Cloud Sync

All patient data syncs instantly to the central dashboard.

04. WELLNESS SPACE

Health Lounge

PREMIUM WELLNESS ENVIRONMENT

A modern Wellness space integrating the health ATM with a private consultation environment for premium communities.

Private & Confidential

Enclosed dignified space for comfortable health consultations.

Corporate Wellness Programs

Premium branded setup for employee health & well being at the workspace.

Customizable & Branded

Fully branded interior designed to match your corporate or institutional identity.

EXPANDABLE ECOSYSTEM

Compatible Add-On Devices

Client-managed compliance & certification • Plug-and-Play integration with Health ATM platform

FIELD IMAGING MODULE Portable X-Ray Unit

- Wireless digital X-ray capture - no radiology room required
- DICOM-compliant output integrated into patient cloud record
- Battery-operated, ruggedised - any terrain

WOMEN'S HEALTH MODULE Breast Cancer Screening

- Non-invasive thermography-based early breast cancer risk
- AI-assisted image analysis flags high-risk thermal patterns instantly
- Mass community screening - no radiation, no specialist on-site

ADVANCED LAB MODULE Clinical Biochemistry Analyzer

- Semi-automated analyzer - lipid, liver, kidney & thyroid panels
- LIS / HL7 protocol integration for seamless cloud data flow
- Facility-grade throughput without a dedicated lab space

From AI-driven diagnostics to specialist-level telemedicine, every component is built to deliver fast, accurate, and accessible preventive healthcare - anywhere in the world.

01 AI-POWERED INTELLIGENCE

 AI Report Analysis Converts complex lab values into simple, color-coded health scores with personalised recommendations.	 Predictive Analysis Identifies future risk for diabetes, hypertension & cardiac disease before symptoms appear.	 AI Diet Plan Personalised nutrition & wellness plans based on BMI, sugar, cholesterol & vitals — instantly.
 AI Doctor Assistant Explains reports, highlights risks & recommends next steps in real time, in plain language.	 AI Prescription Support Assists doctors with AI-generated prescription recommendations for faster, safer consultations.	 Voice Interaction Multi-language voice interface for registration, guidance & report explanation — fully accessible.

02 TELEMEDICINE & REMOTE DIAGNOSTIC ACCESS

 Instant Video Consultation Connect with doctors immediately after screening. No waiting rooms, no travel.	 Remote Diagnostic Access Doctors can remotely access live ECG readings, vitals, digital stethoscope audio, otoscope & dermoscope images - in real time, from anywhere. Specialist-level care without geographic constraints. Dermoscope Live ECG Stethoscope Otoscope
 Digital E-Prescription Legally valid E-prescriptions issued instantly via Whatsapp and cloud record.	
 Follow-up & Referral Structured follow-up plans & specialist referrals embedded in every patient journey.	 AWS Cloud Infrastructure Enterprise-grade AWS backbone with multi-tier redundancy & full data continuity - zero downtime, zero data loss. Primary Production - SSD Secondary Hot Standby Tertiary DR Backup Dedicated servers: AI - Analytics - Vitals - Media - App
 Precision Medical Hardware. Seamlessly Integrated. Clinics on Cloud integrates certified point-of-care devices to deliver accurate, real-time vitals and clinical parameters in every screening - ensuring high precision, reliability, and medical-grade accuracy across every deployment.   	
API & INTEGRATIONS Open API architecture - plugs into any HMIS, EMR, government or insurance system. REST API HL7-FHIR ABDM ready HMIS / EMR Webhooks SSO / OAuth	PATIENT MOBILE APP Reports, prescriptions & health history - instantly on every patient's phone. IOS / Android Health locker WhatsApp reports Health analytics Trends & Insights Reminders

Hospitals & Clinics

Digitise OPDs - Generate Revenue - Build Loyalty

- 10-Min Full Checkup**
Patients pre-screened before they see the doctor.
- Hub and Spoke Model**
Link satellite clinics to central hospital seamlessly.
- New Revenue Stream**
Offer checkups as a paid service - zero extra staff.
- AI-Verified Diagnostics**
Reduce misdiagnosis risk with standardized AI reports.
- WhatsApp Report Delivery**
Instant reports build patient trust & repeat visits

Government Healthcare

Standardise - Scale - Monitor Nationally

- PHC • CHC • District Deploy**
Single deployment model across all public facilities.
- One Central Dashboard**
Real-time health data from every facility at once.
- Telemedicine Enabled**
Specialist access from the remotest locations.
- ABDM & Ayushman Ready**
Seamless integration-zero additional IT overhead.
- AI Early NCD Detection**
Population-scale disease detection powered by AI

CSR & NGOs

Prove Impact - Build Trust - Scale Outreach

- Mass Health Camps**
Screen thousands per day with full digital reports.
- Live Impact Dashboard**
Funders see real data, not post-event summaries.
- Multi-Disease Coverage**
NCD, maternal, child & mental health in one visit.
- SDG 3 Aligned**
Auditable, board-ready, compliance-grade outcomes.
- Last-Mile Reach**
Serve tribal & remote communities beyond clinic range.

Corporates

Invest in Health - Cut Hidden Costs - Drive Performance

- Workforce Health Checkups**
Regular screenings at office, factory or campus - no downtime.
- Real-Time Health Analytics**
Live HR dashboard showing workforce health trends & risk flags.
- Prevent Costly Sick Days**
Detect chronic risks early - before they become absences or claims.
- Reduce Insurance Premiums**
Documented health data helps negotiate lower group health cover.

Societies & Public Spaces

Healthcare Where People Live - Not Where They Travel

- Zero Infrastructure Needed**
Deploy in RWAs, malls & transit hubs instantly.
- Walk-In, Any Time**
No appointment - full check up in 10 minutes flat.
- All Ages Friendly**
Voice UI accessible for elderly & all literacy levels.
- WhatsApp Results Instantly**
Report delivered - family notified in real time.
- Build a Preventive Culture**
Monthly screening becomes a community health habit.

Rural Entrepreneurs

Start Small - Earn Daily - Grow a Health Brand

- Village-Level Health Provider**
Be the first health touch point in your community.
- Serve Where No Clinics Exists**
Fill the gap in areas with no facility within 20+ km.
- Earn Per Screening - Daily**
Charge per checkup, earn every day - no fixed costs.
- COC-Backed Business Model**
Training, branding, pricing support & tech by COC.
- Scale Your Health Franchise**
Start with one kiosk, expand to 5-10 units and build a micro-clinic network.

Industrial Health Screening

Protect Workers - Meet Mandates - Eliminate Downtime

- Safety First
- Regulatory
- Zero Downtime

Pre-Shift Fitness Check

Detect impairment before it becomes a risk incident.

Hazardous Env. Surveillance

Mining, chemical & construction routine monitoring.

Occupational Disease Detection

Respiratory, hearing loss & vision - caught early.

Compliance Health Logs

Real-time records for factory officers & safety audits.

Regulatory Compliance

Factories Act, OSHA & industrial health mandates met.

Reduce Accidents & Claims

Cut lost work days, compensation costs & downtime.
